New AAC Staff Member

The AAC would like to welcome our newest staff member, Catriona Wong! Catriona is the new office administrator for the Association. So please join us in welcoming Catriona to the AAC team.

AquaPort Launches First Look

On April 21, 2008, AquaPort.ca is rolling out the **First Look** at some web tools to mobilize knowledge for Canadian aquaculture. These early stage modules will preview some of the tools under development. For example, a web-enhanced version of the 2007 *Canadian Aquaculture R&D Review* is being developed into a fully interactive projects and people resource - a "who is who and who is doing what" in Canadian aquaculture research and development. A map interface is included enabling the user to explore projects by location.

AquaPort has also created the first ever web search engine dedicated exclusively to aquaculture. This "vertical" search will target only aquaculture resources on the web, excluding the multitude of information you don't want to see. It comes complete with options to browse content by topic.

To foster awareness of new web content, while avoiding the need to visit multiple sites, AquaPort has developed a demonstration module demonstrating how alerts and web feeds can keep you abreast of what's new on the web – aggregated so you can determine its importance at a glance.

And finally – an "Aqua Tube" – a means to share web videos relevant to Canadian aquaculture. Included are videos produced by AquaPort in partnership with Canadian organizations and initiatives. Aquaculture Canada 2007 provided the first test bed for web conference video. Malaspina University-College Fisheries and Aquaculture and the Centre for Shellfish Research also gave AquaPort a chance to showcase some of their work in web video. AquaPort is also producing full web video coverage of the Pacific Region Integrated Multi-Trophic Aquaculture (Sustainable Ecological Aquaculture) Workshop held in Nanaimo, BC, April 11-12.

The more you use it and the more you contribute, the better AquaPort will become. Visit www.aquaport.ca !

By Tim DeJager

AquaPort gratefully acknowledges funding support from DFO-ACRDP, the BC Aquaculture Research and Development Committee of the BC Innovation Council, the Canadian Aquaculture Industry Alliance, Malaspina University-College, and AquaNet.

Student Endowment Fund Donors
